Creating an Account in SendGrid

The screenshot shows a web browser window with the URL `app.sendgrid.com/guide`. The browser's address bar and tabs are visible at the top. The page content includes a sidebar on the left with navigation links: Dashboard, Email API, Marketing, Design Library, Stats, Activity, Suppressions, and Settings. The main content area features a welcome message "Welcome, gokul!" and a blue banner that reads "Send your first emails with Twilio SendGrid". Below the banner, there is a section titled "Create a sender identity" which explains the need for a sender identity and provides a button to "Create a Single Sender". To the right of this section, there is a diagram illustrating the sender identity setup, showing an email address `<jane.doe@your_business.com>` and a button to "Authenticate a domain instead". The bottom of the screen shows a Windows taskbar with the date and time set to 1:00 PM on 11/11/2022.

Welcome, gokul!

To get up and running quickly, please follow the steps outlined below.

Send your first emails with Twilio SendGrid

Create a sender identity

Before sending email, you'll need to create a sender identity. There are [two ways](#) to do this, but we recommend creating a Single Sender to get set up quickly and test your email integration.

Your sender identity is the "from" email address your recipients will see in their inbox. [Learn more](#) about this.

Your Business <jane.doe@your_business.com>
